

HOUSEHOLD

HOUSEHOLD BRUSHES

Bleached bristles - nylon

Our household brushes are designed for manual cleaning of areas in household items that are difficult to reach.

On request, we can make brushes in any dimensions, diameters and with any bristle materials (see the Material information section above)

Dimensions A B C D

Should you wish us to make a special design to your requirements, please specify: overall length, bristle length, diameter, bristle thickness and bristle material

Please note that we use only high quality materials. We use only bleached bristles for our household brushes with light-coloured bristles; these are also suitable for use in connection with foodstuffs. If you are unable to find a brush appropriate for your intended application in our catalogue, contact us: we can design a suitable brush for you and produce it at a competitive price.
